YOUR EXPERIENCED PARTNER IN TURKEY

e-MOR

Who is AQVILA?

years of experience in
serving IT solutions to
Turkish businesses

Your success depends on the strength of your ecosystem.

In order to achieve sustainable success in the enterprise software market you should have strong partners that you can rely on, that focus on the same goals with you and that improve your competitiveness.

We believe in the **importance of the ecosystem and collaboration**. We provide ERP systems, CRM systems and Document Management systems for top Turkish companies, including Polimeks, Kolin, Çelikler, Aslan Yapı, Maya, and many more.

As part of a group of software companies that has **20 years of experience in providing IT solutions to Turkish businesses**, we are looking forward to collaborating with strong partners for mutual sustainable success.

Software Development | Implementation | Training | Support

Having powerful enterprise software assets is getting more and more important for companies.

Enterprise software should be **integrated**, **improve** a company's processes, have **strong reporting** capabilities. A company may operate in an environment where it should respond to changing dynamics. Enterprise software should **adapt to changes** fast. It should not only cover the needs of today, but be **ready for the needs of tomorrow**, also. It should be **user-friendly** and should be **implemented fast**. And **shouldn't cost a fortune**.

Most importantly, enterprise software should include **best practices** and **rapid-fire solutions** to customer pain points.

With all those principles in mind, we developed (in fact, still developing many mind-blowing innovations) the e-MOR Business Applications suite.

You can find the products available in e-MOR suite in the list below:

- ✓ e-MOR ERP for Construction
- ✓ e-MOR ERP for Textiles
- ✓ e-MOR ERP for Agriculture
- ✓ e-MOR ERP for Commerce
- ✓ e-MOR CRM for Real Estate
- ✓ e-MOR InteGRa Document Management (our great Italian partner Agomir SpA develops the InteGRa software and we integrate it with e-MOR)

We Love Our Customers

That's right.

We **love our customers**. Watching our customers get value from the software we provide is our utmost satisfaction.

And we're proud of having **some of the best (and largest) companies in Turkey** as our customers.

That's why committing to solving customers' problems via high-quality software is important.

Many of our customers are large and medium sized. Most are part of a conglomerate. And **we aim solving their expanding needs with our expanding product portfolio**.

We are **open to any potential partnership that complements our product portfolio and creates value for our existing/potential customers**. Provided the potential partner is similarly committed to (if not obsessed with) customer satisfaction.

Thanks to the **precious industry-leading companies** like Polimeks, Kolin, Çelikler, Aslan Yapı, Yıldızlar, Maya, Özdilek, and many more **for being such amazing customers**.

e-MOR Business Applications: Strong Customer Base

"We manage our projects, even projects that are thousands of kilometers away, easily thanks to e-MOR ERP system.

e-MOR ERP Solution Map

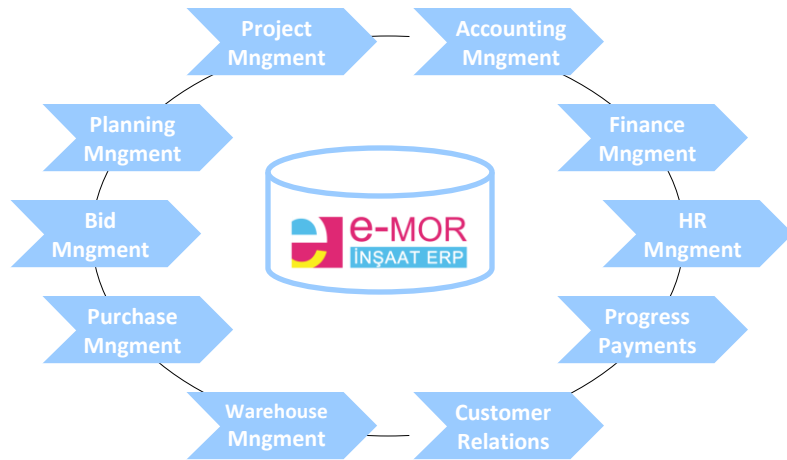

The most comprehensive solution map available for construction companies.

e-MOR ERP Solution Map

All your operations and all your construction sites are integrated

Manage All Your Processes With An Integrated System

Integrate All Your Construction Sites in Turkey and in the World With Your Headquarters

Partnering

When there's a lot of opportunities for growth in the ICT market, who wouldn't like to expand?

A strong enterprise software provider should be able to anticipate the needs of the markets. It should be able to provide innovative solutions to market needs. It should expand its geographical coverage.

While we develop most of the solutions we provide, it's natural that we prefer **partnering with companies who provide industry-leading innovations.**

If you have innovative (and proven) solutions, **contact us.**

If you think your solution portfolio complements ours and there's demand for your product category in our region, or if you think our solution portfolio complements yours and there's demand for our product category in your region, we should definitely meet.

Who is the Ideal Partner?

The ideal partner has been identified as an established software vendor that possess the following characteristics:

- ✓ A business culture that fits Aquila's business culture,
- ✓ An outlook for win-win,
- ✓ Long-term perspective,
- ✓ An experienced and collaborative management team,
- ✓ Solid business strategy,
- ✓ Innovative and proven product portfolio with strong market share in its local market,
- ✓ Product portfolio that complements Aquila's product portfolio,
- ✓ Product portfolio that is needed by the markets Aquila operates or will operate in the near future,
- ✓ Ability and willingness to also add Aquila's products to its own product portfolio and market them in its local market.
